## 7 Bibliography

1. Eskom. *Financial Results*. [Online] 27 June 2011. [Cited: 28 01 2012.] [http://financialresults.co.za/2011/eskom\\_ar2011/downloads/eskom-ar2011.pdf](http://financialresults.co.za/2011/eskom_ar2011/downloads/eskom-ar2011.pdf).
2. *Refrigeration Plant and Mine Air Conditioning Systems*. **McPherson, Malcolm J.** pp. 18-1, 18-71.
3. *Demand-side energy management of a cascade mine surface refrigeration system*. **Schutte, AJ.** Pretoria : s.n., 2007.
4. *Software process quality management and control*. **Ron S. Kennet, Emanuel R. Baker.** s.l. : Taylor and Francis, 2003.
5. *Minimization of operational costs in cooling water systems*. **M.M. Castro, T.W. Song, J.M. Pinto.** 2000, IChem, pp. 1-10.
6. *A systematic approach of optimal cooling tower operation*. **Giorgia F. Cortinovis, Jose L. Piava, Tah W. Song, Jose M. Pinto.** 2009, Energy conversion and Management, pp. 1-10.
7. *Energy efficiency by new control and optimisation of fridge plant systems*. **Pelzer R, Mathews EH, Schutte AJ.** Cape Town : s.n., 2010. Industrial and Commercial Use of Energy.
8. *Case study: Energy savings for deep-mine water reticulation system*. **Vosloo J, Liebenberg L, Velleman D.** 2012, Applied energy 92, pp. 328-335.
9. *Reducing mine water network energy requirements*. **A.J. Gunson, Bern Klein, Marcello Veiga, Scott Dunbar.** 2010, Journal of Cleaner Production, pp. 1328-1338.
10. *Economic benefits of optimal control for water-cooled chiller systems serving hotels in a subtropical climate*. **F.W Yu, K.T Chan.** 2010, Energy and Buildings, pp. 203-209.
11. *Determination of the compressor optimal working conditions*. **C. Aprea, R. Mastrullo, C. Renno.** 2009, Applied Thermal Engineering 29, pp. 1991-1997.
12. *A simplified black-box model oriented to chilled water temperature control in a variable speed vapour compression system*. **J.A. Romeo, J. Navarro-Esbri, J.M. Belman-Flores.** 2011, Applied thermal engineering, pp. 329-335.
13. *Research & Development: Deep mine cooling energy optimisation investigation*. **Arndt, D.C.** Pretoria : TEMM International (Pty) Ltd, 2010.
14. International, Mc Quay. [Online] 2002. [www.mcquay.com](http://www.mcquay.com).
15. Industrial heat exchangers. *Delta T Heat exchangers*. [Online] 2012. [Cited: 03 08 2011.] [www.deltathx.com/uploadsDocs/FoulingFactors.pdf](http://www.deltathx.com/uploadsDocs/FoulingFactors.pdf).
16. *Wolverine tube heat transfer data book*. 2012, pp. 46-57.

- 
17. *A comprehensive design and performance evaluation study of counter flow wet cooling towers.* **Jameel-Ur-Rehman Khan, Bilal Ahmed Qureshi, Syed M. Zubair.** 2004, International journal of refrigeration, pp. 914-923.
  18. *Enhancing performance of wet cooling towers.* **Rafat Al-Waked, Masud Behnia.** 2007, Energy Conversion and Management, pp. 2638-2648.
  19. Energy Efficiency Guide for Industry in Asia. [Online] 2006. [Cited: 2011 06 2012.] [www.energyefficiencyasia.org](http://www.energyefficiencyasia.org).
  20. *Evaporative Cooling Tower and Chilled Beams.* **Bergsten, Bengt.** Göteborg, Sweden : Doktorsavhandlingar vid Chalmers tekniska högskola, 2009.
  21. *CFD simulation of wet cooling towers.* **Rafat Al-Waked, Masud Behnia.** 2006, Applied thermal engineering, pp. 1-14.
  22. *Energy performance of a cooling plant system using the inverter chiller for industrial building.* **Young-hak Song, Yasunori Skashi, Jurng-Jae Yee.** 2007, Energy and buildings, pp. 289-297.
  23. *Bulk air cooling the optimum solution for turbine inlet air chilling.* **Kurt Liebendorfer, Jim Furlong.**
  24. *Design of the world's largest bulk air cooler for the Enterprise mine in northern Australia.* **Brake, D.J.** Brisbane : Mine ventilation Australia.
  25. *The design of spray chambers for bulk cooling of the air in mines.* **S.J. Bluhm, A. Whillier.** 1978, Journal of the South African institute of mining and metallurgy, pp. 1-9.
  26. Chiller plant optimizer. [Online] 03 11 2011. [Cited: 01 12 2011.] [www.coolenergytech.com](http://www.coolenergytech.com).
  27. *Variable condenser water flow.* **Schwedler, Mick.** 2007.
  28. *Fundamentals of Thermodynamics, sixth edition.* **Sonntag, Borgnakke, Van Wylen.** Hoboken : John Wiley & Sons, Inc, 2003, pp. 383 - 450.
  29. *Heat transfer correlations for low approach evaporative cooling systems in buildings.* **B. Costeloe, D.P. Finn.** 2009, Applied thermal engineering, pp. 1-11.
  30. *Efficiency control in a commercial counter flow wet cooling tower.* **C.A.X. Marques, C.H. Fontes, M. Embirucu, R.A. Kalid.** 2009, Energy conversion and management, pp. 2843-2855.
  31. *Optimisation of water-cooled chiller system with load-based speed control.* **K.T Chan, F.W Yu.** 2008, Applied energy, pp. 931-950.
