**Table A.1: Average cost per item**

Average cost per item on total database					Average cost per item of Parkinson's disease medicine				
Year	Variable	Frequency (n)	Mean ± Std Dev (R)	Total cost (R)	Year	Variable	Frequency (n)	Mean ± Std Dev (R)	Total cost (R)
2005	Total prescription cost		±	-	2005	Total prescription cost	-	±	-
	Medical scheme contribution		±	-		Medical scheme contribution		±	-
	Patient contribution		±	-		Patient contribution		±	-
2006	Total prescription cost		±	-	2006	Total prescription cost	-	±	-
	Medical scheme contribution		±	-		Medical scheme contribution		±	-
	Patient contribution		±	-		Patient contribution		±	-
2007	Total prescription cost		±	-	2007	Total prescription cost	-	±	-
	Medical scheme contribution		±	-		Medical scheme contribution		±	-
	Patient contribution		±	-		Patient contribution		±	-
2008	Total prescription cost		±	-	2008	Total prescription cost	-	±	-
	Medical scheme contribution		±	-		Medical scheme contribution		±	-
	Patient contribution		±	-		Patient contribution		±	-

**Table A.2: Average cost per item according to gender**

Average cost per item on total database according to gender							Average cost per item on Parkinson's disease medicine according to gender						
Year	Gender	Variable	Frequency (n)	% Items	Mean ± Std Dev (R)	Total cost (R)	Year	Gender	Variable	Frequency (n)	% Items	Mean ± Std Dev (R)	Total cost (R)
2005	F	Total prescription cost			±	-		F	Total prescription cost	.	.	±	-
		Medical scheme contribution			±	-							
		Patient contribution			±	-							
	M	Total prescription cost			±	-		M	Total prescription cost	.	.	±	-
		Medical scheme contribution			±	-							
		Patient contribution			±	-							
	U	Total prescription cost			±	-		U	Total prescription cost	.	.	±	-
		Medical scheme contribution			±	-							
		Patient contribution			±	-							
2006	F	Total prescription cost	.		±	-		F	Total prescription cost	.	.	±	-

## REFILL-ADHERENCE RATES OF ANTIPARKINSON MEDICATION IN THE PRIVATE HEALTH CARE SECTOR OF SOUTH AFRICA

Van der Merwe S<sup>1</sup>, Lubbe, MS<sup>1</sup>, Du Plessis J<sup>1</sup>, Bekker HE<sup>1</sup>

<sup>1</sup>Medicine usage in South Africa, School of Pharmacy, North-West University, Potchefstroom, South Africa

**OBJECTIVES:** To investigate the cost implication of unacceptable refill-based adherence rates with antiparkinson medicine items.

**METHODS:** A retrospective drug utilisation study was performed on medicine claims data of a pharmacy benefit management company in South Africa during 1 Jan 2005 until 31 Dec 2008. Refill-based adherence rates were calculated for 8 768 antiparkinson medicine items that were prescribed more than once during a four-year period (1 Jan. 2005 to Dec. 2008). The refill-based adherence rate was calculated per trade name by using the following equation: Refill-Adherence rate = (total days of antiparkinson medicine items supplied – days supplied at the last refill) / (date last claimed – date first claimed). (RSA Rand(R)/\$US = 6.8595 on 31 Dec. 2007). [RSA Rand (R)/\$US = 6.38112 (2005); 6.78812 (2006); 7.06926 (2007) and 8.27505 (2008)]

**RESULTS:** A majority of antiparkinson medicine items (53.50%, n = 4 691) had unacceptable refill-adherence rates below 90%, that accounted for 41.62% (n = R16 398 512.00) of the total cost (N = R39 402 898.20) of all antiparkinson medicine items included in this study. Only 36.78% (n = 3225) of antiparkinson medicine items had acceptable refill-adherence rates between 90% and 110%. Those that displayed unacceptably high refill-adherence rates accounted for 9.72% (n = 852) of all antiparkinson medicine items and represented 6.5% (n = R2 574 597) of the total cost. No practical significant difference in the average refill-adherence rates was found between male (93.99% ± 186.99) and female (90.83% ± 175.21) patients. Biperidien, carbidopa/levodopa, and levodopa/benserazide containing products had on average unacceptably low refill-adherence rates (< 90%).

**CONCLUSION:** Although poor obedience to treatment schedules adds up to aggravation of Parkinson's disease leading to death and amplified health care cost, it seems that the refill-adherence rate of antiparkinson medicine items is not very favorable in the private health care sector of South Africa.
